

Product Datasheet

Anti-Ms LPAM-1 PE GRP10508

| | |
|----------------------------|---|
| Description | The rat monoclonal antibody DATK32 recognizes an extracellular epitope of integrin alpha 4 (CD49d) and integrin beta7 (Ly69) components of mouse LPAM-1 complex, which is expressed on the majority of peripheral lymphocytes, as well as on subsets of thymocytes and bone marrow cells. |
| Reactivity | Mouse |
| Tested Applications | FC |
| Immunogen | TK1 cells |
| Concentration | 0.5 mg/ml |
| Storage | Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label. |
| Note | For research use only. |
| Isotype | Rat IgG2a kappa |
| Clonality | Monoclonal |
| Clone ID | DATK32 |
| Application Notes | Flow cytometry: Recommended dilution: 2 µg/ml. |
