

Product Datasheet

Chicken IgY immunoglobulin fraction (10 mg) GRP12707

Species/Host	Chicken
Form/Appearance	Liquid, 0.2 µm filtered
Storage	Store at 2-8°C.
Note	For research use only.
Purity	IgY fraction, purified by a two step proprietary method
Application Notes	Additional Information: Chicken IgY is provided in 10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2. 0.05 % sodium azide is added as preservative. Concentration is 15-30 mg/ml. Purity > 80% based on SDS-PAGE. Background: Chicken IgY immunoglobulin fraction contains chicken immunoglobulin Y from non immunized animals and is excellent for use as blocking reagent in immunoassays like ELISA and Western blot.
