

Product Datasheet

ACETYL CHOLINESTERASE (Bovine Erythrocytes) (GOAT) Antibody GRP1465

Description	Acetylcholinesterase terminates signal transduction at the neuromuscular junction by rapid hydrolysis of the acetylcholine released into the synaptic cleft.
Species/Host	Goat
Reactivity	Bovine
Conjugation	Unconjugated
Tested Applications	ELISA, IP, WB
Form/Appearance	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Concentration	90 mg/mL
Note	For research use only.
Isotype	Antiserum
Clonality	Polyclonal
Source	Acetyl Cholinesterase [Bovine Erythrocytes]
Uniprot ID	P23795
Entrez	540446
Dilution Range	ELISA: 1:5,000 - 1:20,000, Immunoprecipitation: 1:100, Western Blot: 1:500 - 1:5,000
